

FOR IMMEDIATE RELEASE:

Hypertherm Associates Builds the 10,000th MAXPRO200 System

Attributes proven success to high productivity, robust reliability, and low operating costs

HANOVER, N.H.—January 24, 2024—Hypertherm Associates, the New Hampshire-based manufacturer of industrial cutting systems and software, announced the assembly of the 10,000th Hypertherm MAXPRO200[®] system and credits the milestone to thousands of manufacturers and fabricators worldwide who depend on it.

“We built a plasma cutter that delivers high productivity with low operating costs,” said Tyler Kipp, Marketing Program Manager. “Job shops, steel centers, heavy equipment manufacturers — anyone needing solid cutting power and capacity without requiring high-definition cutting — have proven this.”

The Hypertherm MAXPRO200 checked every box, and 10,000 systems later, the machine’s popularity and customer satisfaction speak volumes about its proven technology, quality, and durability.

Serving thousands of customers across diverse industries and applications, Hypertherm Associates pays attention to how the economic landscape and market trends affect manufacturing and production floors of all sizes. Customer pain points are front and center as engineering considers “the right tool for the job” when designing a new machine or technology.

“Customer business goals inspire our design innovations,” said Kipp. “To see the value the MAXPRO200 continues to provide to so many customers are gratifying. We set out to design a best-in-class machine that delivers high productivity and affordability, and 10,000 systems prove we did.”
